Dear International College of Dentists Fellow:

It has been a year since you graciously volunteered to provide a free clinical examination and x-rays (either a panorex with four bite wings or a standard full mouth series) to Peace Corps applicants.

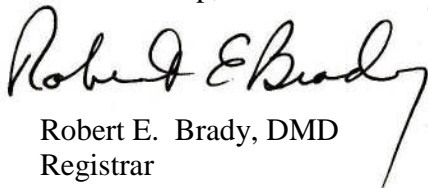

Please remind your staff of your willingness to provide this service. The applicant will bring a dental examination form provided by the Peace Corps and any additional needed treatment will be the responsibility of the applicant.

It is essential that the Peace Corps applicants have a healthy mouth before they are accepted, as many will be located in areas where there is no access to dental care.

This project is proving to be most successful because of ICD members like you who have volunteered to be a part of it. Hopefully this is making your ICD Fellowship more meaningful.

Again, thank you for what you are doing for these Peace Corps applicants and for the International College of Dentists.

In Fellowship,

Robert E. Brady, DMD
Registrar
