What could a mentor have provided you in your first year at Baylor?

Direction and stability. I think that too often in the 1<sup>st</sup> year students get their head in the sand and forget why they are here.

What do you feel best qualifies you to be a mentor?

I have been successful in dental school and have been able to find a real balance with responsibilities in organizations inside the school and out; as well as with my work. Also, I don't have any family members that are dentists, so I have had to find my direction without the guidance of someone outside of the school that is in the field.
